Travel Expenses for instructor may apply when working with a single group from a company, bank, credit union, government agency, etc depending on distance and number of students. See Fee Schedule for cost breakdown.

In some cases we can send our instructor to you instead of you sending many employees to us, thereby reducing the cost of travel and per diem expenses of your employees. Travel and per diem expense of our instructor and assistant can be much less than that of a group of employees traveling to our training location.

See Fee Schedule to determine your cost breakdown.

When Comparing our Notary Public Training to Others, Don't confuse a strawberry with a red chili pepper. Pick the Wrong One and Get Burned

The training, information and feedback you will receive from us go beyond what you will learn from any online information, training or courses. On completion of our training you will receive Two (2) Sets of Eleven (11) individual certificates covering the different subject areas of our training which are suitable for document framing. Our professional training will make you a more valuable employee or potential employee and if working independently, you will be seen as a Notary Public with professional qualities.

Someone once said that our class fee was too expensive or high in comparison to on line courses, to which we replied:

"If all you are interested in is saving money now, don't take any class. The law does not require you to take the class. Logic and common sense are the only things that require you to take a class. If you get in trouble later because you didn't have proper training, you will have no one to blame except yourself. Having a driver's license doesn't mean you know how to drive a racing car on a race track with other professional car drivers. As a representative of the State, you should be professionally trained."

Logically, you wouldn't expect an online training course of \$25 or \$50 to provide you the same type of skills and knowledge our training provides at our much higher cost. Two cars, identical looking on the outside, can have a difference in cost of thousands of dollars between them. Once you lift the hood, you might find the motor is a four, six or eight cylinder, and upholstery is fabric or hand tooled leather, better safety features, and so on. Our training is extensive, specific, and to the point with training material that includes copies of actual documents in use, but even a \$25 class is better than nothing. You should not proceed to offer your services as a Notary Public unless you have had at least the very minimum of training. We have seen many notaries working in banks and credit unions breaking the law.

Our training is designed to teach you how to prevent common and misguided errors that can be costly to you, your employer, your document signer, and the recipient of the document notarized. Notarization errors and/or intentional fraud can become a serious civil and/or criminal liability. The development of skills and detailed knowledge through our training will provide you the confidence needed to professionally carry out your duties and responsibilities of a Notary Public.

Each Notary Public who has not taken our training is more prone to committing errors which place them and/or, if employed, their employers under civil and/or criminal liability. That includes a notary public notarizing documents at the court house, at banks, credit unions, medical facilities, and school districts, government agencies, etc. Think about this for a moment. If a notary public commits the same error several times a day and someone reports this to the proper authorities, how much money will be wasted in multiple fines (if a criminal act), and how much money will be wasted if defending against just one lawsuit or a criminal charge. Not to mention the risk of losing your Notary Public commission.

If you are not yet a Notary Public, you don't have to go through us to process your papers, which we do as a courtesy. You can process them yourself with the Bonding company of your choice. They in turn will send the paperwork to the Secretary of State on your behalf. You can also buy your own supplies. Our goal is to provide professional training to our students who have already been commissioned as a Notary Public for years or have just been or about to be commissioned. Commission and Bond last four (4) years before you need to renew.

We do not extend credit for our classes. If you need an invoice, we will provide one, but it must be paid for in advance of taking our class. The one and only time we provided an invoice to a school district without being prepaid, it took over 60 days to collect. Applications must be approved by telephone before sending in application. You will be given a Code Number over the telephone which must be included on the application form as proof of authorization for acceptance. See Additional Applications below or email us for Application.

See Fee Schedule for Cost Breakdown.

Employer of Notary Public is Sued in Federal Court!

State Attorney General Sues Notary Public

Asking \$20,000 in Civil Penalties for Each Offense

Why Should you send an Employee to Train in Our Notary Public Training Class?

A Notary Public is a quasi-officer of the State of Texas and should be professionally trained. Many individuals who are serving as a Notary Public, especially those with years of experience who are not keeping up with current laws, are committing crimes which can be broken only by a Notary Public because they are not following the law.

The reason these crimes are being committed is due to the poor training or lack of training of the Notary Public.

When a Notary Public commits a crime, the employer is placed in a position in which civil liability can result when a lawsuit is filed in the appropriate court.

The Notary Public is liable in both criminal and civil court for his or her illegal acts in violation of the laws pertaining specifically to a Notary Public.

When these laws are violated, the Notary Public can become liable for additional laws that have been placed for the protection of the general public.

The Employer becomes liable for the lack of proper training of the Notary Public when a crime is uncovered and legal actions taken against the Notary Public in both civil and criminal courts.

The legal actions against the Notary Public and his or her employer can be taken in state and federal courts.

Bad Publicity for the employer can be read in the newspaper, reported on television, radio and the internet which can be damaging to the employer.

Providing the public access to a Professionally Trained Notary Public is not only a service to the public, but also a source of revenue for your business by attracting potentially new clients into your business. Once it is learned that you have a Notary Public on staff, members of the public and of other businesses will refer potential clients to your business.

Commission and Bond last four (4) years before you need to renew.
